■ General /

APPRON MC-191W & MC-192W Addressable Manual Push Button is usually installed in various locations of fire evacuation routes throughout the place. Serves to transmit fire signals that will be forwarded to the signal receiving terminal or as an emergency button in the installation of fire alarms. Addressable Manual Push Button has the advantage of having a unique address ID on the unit, which makes it easier for officers to quickly and precisely locate where the activated manual push button is located.
