FIRE HOSE NOZZLE

JET NOZZLE

■ Features /

APPRON Original Marking in the form of a embossed logo in rubber ring and laser marked fitting.

APPRON Branchpipe Nozzle is used to direct the flow of water at the end of a fire hose into a nozzle, also sometimes known as a fire hose water director. Our range includes various threads, sizes and fitting types including Storz. Fire nozzles are attached either to a branch pipe or directly to a fire hose to direct and control the flow of water onto a fire.
