

ANDALAN ALARM KEBAKARAN

Fire Alarm Control Panel

SHP-TL Series

Features /

- * Each zone indicator has two LEDs and movable label for indicating zone.
- * Control board has 11 control switches, 10 function indicators and 6 fault indicators that clearly show the status of panel to user
- * Accumulation function signaling that will eliminate fales alarms caused by pulses or messy signals.
- * External indicator power-saving function: during power-off period, the external indicator light can be turned off, but it will light during alarm condition. This feature will extend the stand-by period for control panel.
- * Optional telephone device enables user to communicate with external telephone when buzzer sounds and telephone indicator lit.
- * This control panel has manufactured according to UL and EN Standard.

Approvals: **CNS**

Specifications /

Model	SHP-TL (5 ~ 80 zone)	Remark
Power	220V AC/50Hz	Others also available
Voltage Scope	Nominal voltage $\pm 20\%$	
Standby Power	DC 24V	With auto adjustment function
Charging Voltage, Current	DC 24V 100~400mA	
Loop Voltage, Current	DC 26V short circuit under 5V 30mA	
# of heat detector connected	No limit	Except electronic-type
# of smoke detector connected	30/zone	
# of indicating lamp, bell connected	# of zone x 1.2	
End of Line Resistor	10k Ω	One per loop
Material	1.2mm steel plate	
Color	Red/Ivory white	Others also available
